

## Warehouse Management and 3PL Operations

### THE CLIENT

The Client is one of the largest Garment Manufacturers and Exports in India headquartered in the Garments town of Tirupur. The Client was setting up a 3PL (Third Party Logistics) for one of their largest European Customer based in Netherlands. This required the Client to implement the IT infrastructure and warehouse management system on par with other warehouses of their Customer across the globe.

SANDS convinced the Client and their Customer team in Netherlands of the suitability of SAP Business One for automating their 3PL operations end-to-end. SANDS was also chosen as Implementation Partner for implementing SAP Business One.

### OUR ENGAGEMENT

- ① Business Process Study and Mapping
- ① Creation of a Warehouse Management Add-on
- ① Creation of Variant Configuration Module
- ① Integration with Barcode Application
- ① Training and User Handholding

### ENGAGEMENT HIGHLIGHTS

- ① Qualified and selected as implementation partner jointly by Client IT Department and Netherlands IT team
- ① Successful integration with Desktop Barcode Scanners, PDA Scanners and Bar Code printer for both 1-D and 2-D barcodes
- ① Solution tested and approved jointly by Client IT Department and Netherlands IT team
- ① Development of a Variant Configuration module – characteristic of a Garment Manufacturing business

### THE SANDS VALUE-ADD

- ① Cost-effective automation solution
- ① Participated in design of overall process flow
- ① Introduced 'POKE-YOKE' – Fool-proof checks for pick and pack
